

Industry Innovation Forum Resilient Supply Chains

Increasing value in the supply chain while reducing waste & emissions

Thursday 28 April 2016

Weetwood Hall, Leeds

A unique opportunity for Industry to discuss supply chain challenges and opportunities in relation to food security with your peers, leading researchers and academics.

On the day

You will be able to participate in facilitated activities to identify, cluster and prioritise knowledge needs. This will be followed by interactive roundtable discussions to identify potential collaborations/projects and access to funding.

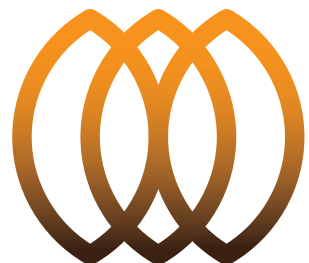

N8 AgriFood will carry out follow up activities to develop the ideas generated in order to stimulate new research and development collaborations.

Participant numbers are strictly limited to enable relaxed and productive networking.

The UK agri-food supply chain is worth £96 billion and employs 3.8 million people

N8 AgriFood provides a single portal for industry to access the greatest concentration of agri-food academic expertise in the UK

www.n8agrifood.ac.uk

You will be able to:

- Match industry needs with world-leading science solutions
- Create ideas, insights, innovations and business opportunities through an agglomeration of talent and expertise
- Generate partnerships for development of supply chain innovations and new models for industrial collaborations
